

## Seismic Survey, Mannar Basin

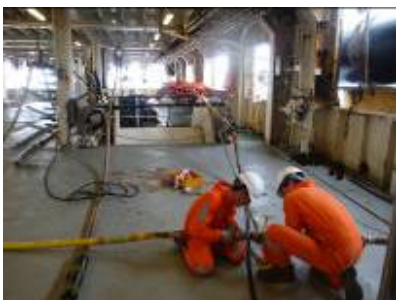

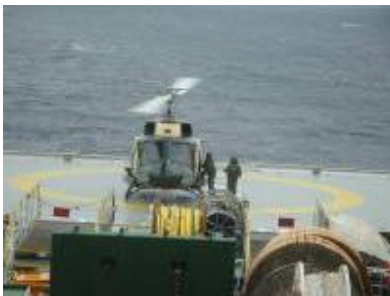

Marking a milestone in oil exploration activities in Sri Lanka Cairn Lanka appointed CGGVeritas to carryout a 3D seismic survey in block SL-2007-01-001 in the Mannar Basin from December 2009 to January 2010, using the seismic vessel "SR/V Viking II". CGGVeritas in turn appointed Hayleys Energy Services (HES) as Service Provider for the duration of the seismic survey.

From the inception of the survey, marked by the arrival of the seismic vessel to the Colombo Port, where HES organized the inauguration ceremony flagged off by HE the President Mahinda Rajapakse and attended by many dignitaries.

We have proven our competence and capability in providing Vessel Agency services, Husbanding, Customs Clearance, Accommodation, Travel and crew transfers to and from the vessel and Medical services while supplying provisions, bunkers, chase boats, and security staff to oversee and ensure the safety of the vessel, personnel and the survey equipments.

We are proud to have successfully handled the very first crew change in Sri Lanka, on a vessel moving at a constant speed of 4 knots.

At least one safety specialist of our team was constantly with the crew of more than 25 members, ensuring their safety all the way from the point of pickup at the airport and throughout their stay.

General Manager

**Letter of Appreciation for support services for the 3D Seismic Survey in Mannar Basin  
Block No 2007-01-001, Sri Lanka**

I take great pleasure in commending Hayleys Energy Services (Pvt.) Ltd. (HES) for the exemplary services rendered to us during the 3D Seismic Survey in the Mannar Basin, Sri Lanka.

HES facilitated the Seismic survey by providing support services from its inception, by organizing an inauguration ceremony and providing a multitude of services ranging from vessel agency & logistics, helicopter operations, chase boats, supply of bunkers & provisions, medical & emergency support and handling the Crew including travel, accommodation and transfers to and from the vessel.

Your strict compliance to Environment, Health and Safety guidelines ensured a casualty free environment throughout the survey. The HES Team facilitated the smooth flow of events, throughout the duration of the survey, liaising with government authorities and local partners.

We are delighted by your project management capabilities and professionalism, and intend to work closely with HES in future.

Yours Sincerely

Robert N Davies  
Operations Project Manager  
Seismic Research Vessel Viking II
